## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114.

Applicant's submission filed on 03/14/2007 has been entered.

### ***Information Disclosure Statement***

2. The information disclosure statement (IDS) submitted on 03/14/2007 was filed after the mailing date of the RCE on 03/14/2007. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

### ***Allowable Subject Matter***

3. Claims 1-32 have been allowed.

### ***Reasons for Allowance***

4. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, and similarly in claims 8, 16, 20-22, and 31-32, the prior art of record fails to teach or suggest a mobile wireless device and its corresponding method of transmitting an alert message from a first mobile wireless device to a second mobile wireless device, wherein the broadcast content is presented to a first user of the first media device; and at the first media device, generating an alert message formatted to reconfigure the second media player device to

provide the broadcast content to a second user of the second media player; and then transmitting the alert message from the first media player to the second media player to provide the broadcast content to the second media player. Robert Cooper (America Online) simply teaches computer network users has a buddy list of users and the user within the list can receive information from one or more of the other users that corresponds to the TV programming viewed by the other network users; however, Cooper is totally silent on transmitting alert message from a mobile wireless device to another mobile wireless device as well as Cooper is silent of the step of generating at the first media player the alert message formatted to reconfigure (or tuning) the second media player to provide the broadcast content to the second user of the second media player. McKissick (United Video Properties) simply teaches to provide communication of messages among TV users using the set top box; and similar to Cooper, McKissick is also silent on the features as noted from the present invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
